

**Civil Project Engineer,
Design Technologist**

In response to continued and ongoing growth, Koers & Associates has an immediate opening in our **Parksville and Comox Valley Offices** for a Project Engineer and a Design Technologist with 5 to 10 years of progressive experience.

With a staff of 24 including 7 professional engineers, Koers provides consulting engineering services to most of the municipalities and regional districts on central Vancouver Island, and to larger land development clients. We carry out municipal infrastructure planning, design, and construction management services for water, sewerage, drainage, road improvements, new multi-phased residential and recreational developments, and heavy industrial water supply upgrades.

We take pride in our commitment to quality and the long-term relationships that we have developed during our more than 20 years of business. We will continue to build upon our reputation with an emphasis on environmental stewardship, sustainability, and maintaining a clientele with strong professional ethics.

Vancouver Island is extremely attractive from a growth and recreational perspective. Growth over the past 15 years has been higher than average for the province, resulting in great opportunities for growth related industries, including municipal infrastructure engineering.

Outdoor recreation is world renowned, with many provincial and national parks in unspoiled mountain, river, lake and beach settings. Opportunities for fresh and salt water fishing along with power boating, water skiing, sailing, canoeing and kayaking abound. There are more than a dozen golf courses between Parksville and the Comox Valley, which is home to Mt. Washington Alpine Resort and the Island's 2nd international airport.

We offer great working conditions, attractive compensation, opportunities for career growth and employee ownership participation, and an environment that strives to accommodate the work life balance.

If this opportunity appeals to you send your resume with a covering letter by March 14 to Rob Hoffman, P.Eng. at rhoffman@koers-eng.com
